

# It's no secret that Rust is your Air Conditioner's greatest threat!

---

Sun, sand and surf – while we love to enjoy the lifestyle that goes hand in hand with the beautiful Gold Coast and surrounds, those same elements create an extremely corrosive atmosphere attacking exposed metalwork and reducing the life of any uncovered equipment.

Air conditioning equipment is particularly susceptible to these conditions. While well constructed and made of quality materials most Air Conditioners prematurely fail due to aggressive rusting.

At Wired Air we believe in and strongly recommend our rust treatment service and ongoing maintenance to extend the life of your air conditioning unit.

Our technicians strip the new unit and treat all components with recognised rust preventative products. After careful reassembly your investment will have an increased life when exposed to the harsh conditions the Gold Coast has to offer.
